Keep guests coming back with upcoming events.

Advertisement space for current promotions.

Improve stay time!

Millennials don't just think of dining out as an opportunity to eat—they think of it as a social experience. HangHere includes games and contests your customers can play with each other to increase their stay time.

Increase spending!

If you want Millennials to spend their evenings with you, you'll need to offer great deals and promotions. List your upcoming events along with special offers to entice young people to spend more and visit frequently.

Bring them back!

Most Millennials don't show up to a bar or restaurant without doing some research first. They're always checking websites. List your menu, your cocktail list, and your daily specials to keep them coming back again and again.

Frequent Questions & Answers:

What's my up-front investment?

Unlike other in-house tablet-based entertainment systems, HangHere requires no up-front hardware costs and no continuing repair costs. Your customers use their own devices to access your HangHere app.

How much do updates cost?

Since your HangHere app is located in the cloud, any updates we add will be automatically pushed to your app. New features and changes don't cost you a dime.

How long is my contract?

Although we guarantee your guests will love your HangHere app, we don't lock you into a contract for life. Your HangHere app is billed on a monthly basis and can be canceled with as little as a 30-day notice.

Do I need to offer WiFi?

An internet connection is required to use your app. We recommend you offer a WiFi network for a reliable speedy experience, but cellular networks should work fine also.
